

2013 C-BT Quota Update: May 10 Meeting

After discussion during the May 10 meeting, the Northern Water Board of Directors decided to leave the Colorado-Big Thompson Project quota at 60 percent, the amount [set in April](#). Much of the discussion focused on the below-average reserves in C-BT reservoirs and the impact this year's quota could have on availability in future years.

Directors still have the option to increase the 2013 in subsequent meetings and plan to discuss this option in June.
