

A variety of solutions will be needed to address Northern Colorado water users' demands and diverse challenges, and that's why Northern Water is collaborating with entities across the region and offering an array of new water efficiency programs.

Landscape Consultations

Northern Water offers a wide array of water-efficient, Colorado landscape expertise, and we want to share that knowledge with you. That's why we're offering a limited number of free landscape consultations — ranging from 60-90 minutes, and providing guidance and assistance for your specific landscaping needs.

Who can take part in this program?

- Municipalities
- Schools
- Businesses
- Homeowners associations
- Other entities within Northern Water's boundaries

Consultations may include:

- Plant selection
- Irrigation technology and management
- Turf maintenance
- Soil management and amendments
- Rainwater usage
- Landscape installation tips
- References for water-efficiency certified contractors
- Landscape use and purpose
- Goals and needs evaluation

What will you need to bring to your consultation?

- Photos of your current landscape
- Photos or drawings of your landscape plans
- Goals for your project
- Any additional ideas and considerations
- Budget
- Timeline for project
- Challenges you're facing
