

Northern Water’s Winter Water Efficiency Stakeholder Meeting set for Jan. 15

Northern Water allottees and other water efficiency partners within our delivery area are invited to join us on Jan. 15 in Berthoud.

The 2019 Winter Water Efficiency Stakeholder Meeting – which will take place at Northern Water’s headquarters (220 Water Ave. in Berthoud), and run from 9 a.m.-1 p.m. – serves as an opportunity for all to learn and share innovative tools, techniques and policies needed for identifying, structuring and financing efficiency projects.

Our goal is to equip you with options to plan for and implement water efficiency, and attendees will also have the opportunity to share projects they have underway. We hope this will be a fun, informative and collaborative event. A schedule of the day’s events is listed below.

Lunch will be provided.

Be sure to RSVP by Jan. 8, which you can do by clicking [here](#).

If you have any questions, please contact Lyndsey Lucia at llucia@northernwater.org, or at (970) 622-2342.

- 2 p.m. **Adjourn**

About Northern Water:

Northern Water, a public agency created in 1937, provides water for agricultural, municipal, domestic and industrial uses to an eight-county service area with a population of nearly 960,000. Northern Water and the U.S. Bureau of Reclamation operate the Colorado-Big Thompson Project, which collects water on the West Slope and delivers it to Northeastern Colorado through a 13-mile tunnel beneath Rocky Mountain National Park. It and the Municipal Subdistrict are currently developing the Windy Gap Firming Project and the Northern Integrated Supply Project to enhance Front Range water supplies for the future.
